

Acqua Azzurra

**Instant blue colorant for lakes and ponds with dirty waters.
Eliminates the ugliness of turbid waters**

BENEFITS

- Provides a mirror-like blue water coloration of great beauty
- Limits sunlight penetration preventing algae and aquatic weeds
- Improves quality of waters used for irrigation purposes; prevents odours
- Restores a clean effect on turbid waters of golf courses and parks
- Very cost effective, needs very low application dosages.
- Safe and harmless to fish, aquatic wildlife and drinking pets
- High performance rapid dispersion formulation. Easy to distribute

TECHNICAL FEATURES:

Concentrated lake & pond natural blue colorant, made with non toxic food dyes. Immediately effective and long lasting, is ideal in all closed water basins in golf courses, parks and gardens with ponds or fountains. Acts clearing grayish, muddy and dirty waters; prevents algae formation. Completely harmless to fish, aquatic wildlife, animals and humans

APPLICATION METHODS

Acqua Azzurra must be used effectively only in the treatment of water basins with standing water with little or no flowing. Not to be used in streams or ponds containing water for drinking purposes. Empty the bottles of Acqua Azzurra from several parts of the shore. The natural movement of water acts as a diffuser of the product along the entire surface of the lake.

Use at dosage of 8 liters of Acqua Azzurra in 10,000 m² (1 ha) of surface to obtain a coloring of 1 – 2 m depth along the water profile. Protect the product from freezing.

PACKAGING: 1liter bottle in 6 liter boxes
