

Extragreen C3

Light green, foliar pigment. Revitalizer of turf natural color and visual quality. With protective action from solar radiations.

BENEFITS

- Creates a stunning instant natural green color that persists for 3 weeks, slowly fading away
- Helps to achieve a uniform and homogeneous light green coloration hiding weeds and *Poa annua*
- Camouflages discolorations, burns and yellowing (dry spots, freezing damages, diseases, etc.)
- Contributes to the prevention of summer thermal stress reflecting harmful solar radiations
- Tank mixed with preventive and curative fungicides improve their efficacy and performance
- In spring, alone or tank mixed with Greener, anticipates green-up, hiding *Microdochium* damages
- In re-seeded sports fields, greens and fairways, sprayed before seed emergence, creates an optimal microclimate for germination

TECHNICAL FEATURES:

Concentrated lawn pigment with a similar color of chlorophyll. Partly penetrates into leaf mesophyll and is not removed with mowing operations. Reflects harmful infrared and far-infrared light rays, limiting plant's thermal stress.

APPLICATION METHODS:

Color recovery of stressed *Poa annua* and turfgrass foliar yellowing caused by nutritional stress, heat and disease stress (Dollar Spot) also mixed with pesticides: 2,5 – 3,5 liters / ha in 800 liters H₂O

In prevention of summer stress and localized dry spots: 3 – 4 liters / ha in 800 liters H₂O

On stadiums and putting greens before special matches and tournaments: 2,5 liters / ha in 800 liters H₂O. Best results when tank mixed with Greener (25 liters / ha)

In prevention of winter leaf yellowing of *Poa pratensis* and tall fescue: 2,5 – 3,5 liters / ha in 800 liters H₂O. Best results when tank mixed with Greener (25 liters / ha)

In reseeded sports fields, putting greens and fairways after scarification: 3 – 4 liters / ha in 800 liters H₂O

For spring green-up enhancement in late wintertime on sports stadiums and golf courses:

2,5 – 3,5 liters / ha in 800 liters H₂O. Best results when tank mixed with Greener (25 liters / ha)

Do not irrigate or mow for 6 hours after treatment. Avoid contact of product on sidewalks or other stone surfaces. It is imperative to treat pigments with dry leaves. Make sure that the color dries completely before using the facility

PACKAGING: 5 Kilograms (4,5 liter) drum
